

Dear Students,

The Telegram channel below is established and managed by our students (Kerem Altingüneş- Didem Okumuş). It will be used for communication purposes among preparatory students. You will be notified when separate class groups are created.

Note: This channel has been established for students studying at Ostim Technical University to follow the announcements and developments about the preparatory school during the term. You can log in to the Channel by entering your personal information (name-surname-profile photo) correctly. Do not use it for anything other than its intended purpose, as there will be lecturers on the channel who teach in the department. If you are not a 2021-2022 Preparatory student, ignore this announcement.
